

The technical drawings show the dimensions for two components:

- 1916 HECO PARA CUBETAS:** A long, narrow component with a total length of 2542 mm. It features a series of 10 trapezoidal openings. The width is 396 mm. The distance from the left edge to the first opening is 51 mm, and from the last opening to the right edge is 51 mm. The distance between the centers of the openings is 2440 mm. The right side has a motor housing labeled "CUBRE MOTOR" with a width of 475.5 mm. A detail view shows the top profile with a height of 284 mm, a top width of 305 mm, a bottom width of 294 mm, and a depth of 31 mm. The central opening has a diameter of 115 mm.
- 2013 TAPA CUBETAS:** A long, narrow component with a total length of 2542 mm. It features a series of 10 circular openings. The width is 396 mm. The distance from the left edge to the first opening is 51 mm, and from the last opening to the right edge is 51 mm. The distance between the centers of the openings is 2440 mm. The right side has a motor housing labeled "CUBRE MOTOR" with a width of 475.5 mm. A detail view shows the top profile with a height of 176 mm, a top width of 305 mm, a bottom width of 294 mm, and a depth of 31 mm. The central opening has a diameter of 115 mm.
